October 22, 2012

Bobbi Owen

Senior Associate Dean for Undergraduate Education.

Dear Dr Owen:

We are currently planning to restructure the relationship between the Department of Biomedical Engineering and the Curriculum in Applied Sciences and Engineering (CASE). As a result, we would like to eliminate two tracks in the CASE program: Computer Engineering and Materials Science.

With this change, we would continue the above tracks for current students in the tracks; however, students would not be able to declare their major in either track, starting in fall 2013.

The Biomedical Engineering track will remain as it currently is.

Please let me know if you have any questions or need more information.

Sincerely,

A handwritten signature in black ink that reads 'Nancy Allbritton MD, PhD'.

Nancy Allbritton, MD, PhD

Chair, Curriculum of Applied Science and Engineering
