

February 26, 2013
Miscellaneous Curriculum Changes (effective fall 2013)

Department of Psychology

Major in Psychology (BS)

- To clarify that the three (3) social and behavioral sciences Approaches courses (SS/HS) plus the additional non-historical SS Approaches course for the major must be from a department other than psychology.

Department of Statistics and Operations Research

Major in Mathematical Decision Sciences

- To eliminate the elective requirement for the major (four courses outside the Departments of Mathematics, Computer Science, and Statistics and Operations Research) because this is fulfilled by virtue of completing the General Education curriculum
