CHRISTIAN ILIADIS
Department Chair

Nick Siedentop, Curriculum Director for Undergraduate Curricula –

Please find our proposed revisions to the Physics Major, B.A. Quantitative Finance Option below:

1. Maintain a minimum cumulative GPA of at least 2.85
Curricular reason: Requested by Business School to be consistent with the requirements for students majoring in business.
2. Students majoring in the quantitative finance option cannot pursue the minor in business.
Curricular reason: The students in this major take too many electives for a minor according to the Business School. Required courses for the minor are also not relevant to the Quantitative Finance major.
3. Footnote beneath “Six additional credits chosen from BUSI (numbered above 400)...”: “The Business School allows majors in this program to take only the following courses as electives: BUSI 407, BUSI 410, and BUSI 584. Students in this program are also strongly encouraged to take the BUSI 407 elective.”
Curricular reason: There are two reasons for this. These electives listed are the most germane to the major and other BUSI electives are of little benefit to students in the major. The Business School is also concerned about students in the program competing for the limited number of seats in the other BUSI electives that the Business School offers.
4. Footnote for BUSI 588 and BUSI 688: “BUSI 588 and BUSI 688 are half-semester courses. Students are advised to take these in the same semester.”
Curricular reason: This is just informational to help students with planning their schedules. We have had issues with students not taking this into consideration when they do their planning.

Student advising transition plan:

- informational training for the faculty on these new requirements
- informational email sent out to students currently in the major regarding these new criteria, offering individualized advising
- website update in order to circulate the new information
- Quantitative Finance option advisor Dr Reyco Henning will promulgate information during advising meetings

Signed,

Dr. Christian Iliadis

PHYSICS MAJOR, B.A.

rhenning@unc.edu

The goal of physics and astronomy is a unified description of the properties of matter and energy. The study of matter and energy encompasses a range of phenomena, from the subnuclear to the cosmological. Physics seeks to understand the way the universe “works,” from the very small scale (quarks and neutrinos) to the human scale (materials encountered in daily life) to the very large (the structure of the cosmos). Different approaches and technologies are used in these different regimes.

Department Programs

Majors

- Physics Major, B.A. (p. 1)
- Physics Major, B.S. (<http://catalog.unc.edu/undergraduate/programs-study/physics-major-bs>)

Minors

- Astronomy Minor (<http://catalog.unc.edu/undergraduate/programs-study/astronomy-minor>)
- Physics Minor (<http://catalog.unc.edu/undergraduate/programs-study/physics-minor>)

Graduate Programs

- M.S. in Physics (<http://catalog.unc.edu/graduate/schools-departments/physics-astronomy>)
- Ph.D. in Physics (<http://catalog.unc.edu/graduate/schools-departments/physics-astronomy>)

Student Learning Outcomes

Upon completion of the physics program, students should be able to:

- Demonstrate knowledge of major concepts, theoretical reasoning, and empirical findings in physics and/or astronomy – Knowledge Base in Physics
- Apply knowledge of physics and mathematics to solve problems – Critical Thinking and Problem Solving
- Effectively conduct research under guidance of faculty member – Research and the Advancement of Physics and Astronomy
- Gain entry to top graduate programs, employment as physicists in industry, teaching positions in high school physics and astronomy, or apply their skills in other rewarding careers – Preparation for Future Career

Requirements

In addition to the program requirements listed below, students must

- attain a final cumulative GPA of at least 2.0
- complete a minimum of 45 academic credit hours earned from UNC–Chapel Hill courses
- take at least half of their major course requirements (courses and credit hours) at UNC–Chapel Hill
- earn a minimum of 18 hours of C or better in the major core requirements (some majors require 21 hours).

For more information, please consult the degree requirements section of the catalog (<http://catalog.unc.edu/undergraduate/general-education-curriculum-degree-requirements/#degreerequirementstext>).

Physics Major, B.A. – Standard Option

Code	Title	Hours
Core Requirements		
PHYS 118	Introductory Calculus-based Mechanics and Relativity	4
PHYS 119	Introductory Calculus-based Electromagnetism and Quanta	4
PHYS 201 or PHYS 401	Basic Mechanics ¹ Mechanics I	3
PHYS 211 or PHYS 311	Intermediate Electromagnetism ² Electromagnetism I	3
PHYS 281L	Experimental Techniques in Physics	2
PHYS 331	Introduction to Numerical Techniques in Physics	4
Nine additional credits chosen from ASTR (numbered above 300) and PHYS (numbered above 200)		9
Additional Requirements		
CHEM 101 & 101L	General Descriptive Chemistry I and Quantitative Chemistry Laboratory I	4
CHEM 102 & 102L	General Descriptive Chemistry II and Quantitative Chemistry Laboratory II ^H	4
MATH 231	Calculus of Functions of One Variable I	4
MATH 232	Calculus of Functions of One Variable II	4
MATH 233	Calculus of Functions of Several Variables ^H	4
MATH 383	First Course in Differential Equations ^H	3
Total Hours		52

H Honors version available. An honors course fulfills the same requirements as the nonhonors version of that course. Enrollment and GPA restrictions may apply.

MATH 383	First Course in Differential Equations ^H	3
Total Hours		62

H Honors version available. An honors course fulfills the same requirements as the nonhonors version of that course. Enrollment and GPA restrictions may apply.

- ¹ Spring course
- ² Fall course

³ Students are strongly encouraged to take BUSI 407.

⁴ BUSI 101 and ECON 101 are prerequisites for BUSI 408, but these prerequisites may be waived for students in the Quantitative Finance program.

⁵ BUSI 588 and BUSI 688 are half-semester courses. Students are advised to take these in the same semester.

Students must maintain a minimum cumulative GPA of at least 2.85. Students majoring in the quantitative finance option cannot pursue the minor in business.

Business Administration (BUSI) course descriptions (<http://catalog.unc.edu/undergraduate/schools-college/kenan-flagler-business-school/#coursestext>).

Mathematics (MATH) course descriptions (<http://catalog.unc.edu/undergraduate/departments/mathematics/#coursestext>).

Physics (PHYS) course descriptions (<http://catalog.unc.edu/undergraduate/departments/physics-astronomy/#coursestext>).

As part of these course requirements, candidates for the B.A. degree must earn grades of C (not C-) or better in at least 18 credit hours of courses that are listed under Core Requirements.

Sample Plan of Study

Sample plans can be used as a guide to identify the courses required to complete the major and other requirements needed for degree completion within the expected eight semesters. The actual degree plan may differ depending on the course of study selected (second major,

minor, etc.). Students should meet with their academic advisor to create a degree plan that is specific and unique to their interests. The sample plans represented in this catalog are intended for first-year students entering UNC–Chapel Hill in the fall term. Some courses may not be offered every term.

Standard Option

Course	Title	Hours

Special Opportunities in Physics and Astronomy

Honors in Physics and Astronomy

The honors program offers exceptionally well-qualified students an opportunity to perform original research with a faculty member and graduate with honors or highest honors. It requires an overall grade point average of at least 3.3 and a grade point average of at least 3.4 for physics courses at the end of the junior year.

Students who wish to enter the honors program should consult with the departmental coordinator (<http://physics.unc.edu/undergraduate-program/undergraduate-research>) for the program no later than the preregistration period in the spring semester of their junior year.

Departmental Involvement

The Society of Physics Students, open to anyone interested in physics, builds connections between undergraduates, graduate students, faculty, and alumni. The society invites visitors to give talks and sponsors a number of events for students each year. Women in Physics at UNC–Chapel Hill, an organization that aims to provide resources, advice, and

an encouraging social atmosphere for women in the field of physics, welcomes physics majors and all women interested in physics.

UNC–BEST

The UNC Baccalaureate Education in Science and Teaching (UNC–BEST) Program is a collaboration between the School of Education and the College of Arts and Sciences and is designed to allow undergraduate science majors interested in teaching high school science the opportunity to earn their science degree and obtain licensure as a North Carolina high school science teacher in four years. UNC–BEST students meet all the degree requirements for their degree using PHYS 410 as one of their upper-level physics courses.

Code	Title	Hours
PHYS 410	Teaching and Learning Physics	4
EDUC 689	Foundations of Special Education (may substitute EDUC 516)	3
EDUC 532	Introduction to Development and Learning (may substitute EDUC 403)	3
EDUC 615	Schools and Community Collaboration (may substitute EDUC 533)	3
EDUC 593	Internship/Student Teaching	12
EDUC 601	Education Workshops	1

For more details on admission requirements, application deadlines, and submitting an online application, visit the School of Education Web site (<http://www.unc.edu/uncbest/options.html>).

Undergraduate Awards

The department gives awards each year to the senior (Shearin Award) and junior (Johnson Award) who demonstrate the greatest achievement. In addition, the department awards the major with the most research achievement the Robert Sheldon Award for Undergraduate Research.

Undergraduate Research

All majors conduct at least one semester of research under the supervision of a faculty member. Many enjoy the experience so much that they continue for several semesters. An approved learning contract is required prior to registering for PHYS 295 and PHYS 395, and students must be registered within the first week of classes.
